Revised Final Development Plan

On this date the Director of Community Development and the City Manager approved two administrative changes to the approved Final Development Plan, Phase I, of the SouthPoint Office Center, 1601-1701 West 82nd Street. The approved changes allow 1) expansion of the basement area of the Phase I building (the easterly two-story office building) to the limits of the building's footprint for use as storage and other office uses, and 2) expansion of the Phase I area into the Phase III area (the 12 plus or minus story office tower) to permit construction of a truck loading dock.

This approval is given with the following conditions:

- 1) All applicable building codes and fire codes to be met;
- 2) The intent of the overall planned development be maintained; and,
- 3) Occupancy of the basement area of the Phase I building be limited to 25 persons to avoid parking congestion.

SUBJECT: Southpoint Office Center

I met with Bruce Palmer of United Properties on July 13, 1983 to review the first building to be constructed at Southpoint Office Center. The rezoning, preliminary development plan and first development plans have previously been approved by the Planning Commission and City Council (letters of transmittal attached) for Phases I and II. The proposed building is Phase I of this three phase development (corner of 82nd Street and 35W).

This building is proposed to be under construction by early September as they have a firm interested in the majority of the space and possibly the entire building. United Properties is requesting two changes to the approved plan. The first change is enlarging the basement to accommodate more storage area and possibly a small print shop for the user of the building. The occupancy of the additional area would be limited to 10 to 25 persons. This can be approved administratively and is recommended to Bob Purcell that he approve this change with one condition that the space be limited to a maximum occupancy of 25 persons.

The second request is now difficult. The user of the building needs to have a loading dock facility to run the business. United Properties determined that a loading dock cannot be directly attached to this Phase I building because of grade changes. Therefore, they are requesting to build the loading dock with a connection to the Phase I building. The loading dock for the entire development is shown and proposed in the Phase III tower which only had rezoning and preliminary development plan approval. Therefore, we have no mechanism under the ordinance to approve this change administratively. They indicate, in the attached letter, that this is considered temporary construction. The loading dock would basically be below grade and not offensive in appearance.

I have discussed both changes with Lyle Berg and Jan Gasterland and they also support the request.

In conclusion, we will approve the administrative change allowable in their first request. We would like to approve the second request but are unaware of any procedure to accomplish this end. The only condition I would expect adding to the second request is a condition that they meet the building code and the intent of the overall planned development. It is my understanding that this loading dock on the Phase III site would be incorporated into the tower in Phase III when constructed.
