RE: Small Cell Antenna Development Application
Verizon Wireless || Mall of America Parking Lots North and West
PIN 0102724240007; 0102724420006

Dear Mr. Johnson,

Attached please find materials for the purpose of application for small cell antennas to be placed on light poles in the parking lot areas of the Mall of America. Verizon intends to remove and replace six (6) existing parking lot light poles with structurally adequate poles of the same style, diameter, color, and height. Small cell antennas and equipment will be placed on the poles. A shroud enclosure of the same color of the pole will be placed over the antennas and equipment. The purpose of the installations is to provide outdoor distributed antenna service to cellular carriers on the Mall of America DAS network. The parking lots are north of the mall, and east of the mall.

This letter will be followed up with the administrative zoning application fee, and an original zoning application with signatures.

Please contact me with any questions about this application. Thank you for your time on this review.

Respectfully,

A handwritten signature in cursive script that reads "Julie R Plante".
