André L. Germon, *Journal of the American Statistical Association*, 2022, 117, 2, 1222-1232. This is the first of the three papers in this special issue. The paper, "Some new theory, data, and evidence for the random field MCMC (RF-MCMC)", DOI:10.1080/01621459.2021.2011761, is devoted to the study of the random field MCMC (RF-MCMC) algorithm, which is a generalization of the Metropolis-Hastings algorithm. The paper discusses the theoretical properties of the RF-MCMC algorithm, including its convergence and mixing time. The authors also provide empirical evidence for the performance of the RF-MCMC algorithm on various datasets. The paper is a comprehensive review of the current state of the art in RF-MCMC, and it provides a clear and concise introduction to the topic for researchers and practitioners alike.
