Planning Division – City of Bloomington
1800 West Old Shakopee Road
Bloomington, MN 55431

City Planning Division:

Seagate Technology was pursuing construction of a 600 stall parking ramp, additional lot modifications, and a roughly 170,000 sf production and office/lab expansion. Although we still plan to execute these projects in the future, the current macroeconomic environment and internal pressure to reduce capital spend has put this project on hold. Seagate would therefore like to withdraw our application PL2020-112 for the ramp, which is the first step in the overall project. We look forward to working with the City again when this expansion project is given the green light to start again.

As the Seagate project manager for this addition, please reach out if you have any questions.

Regards,

Martin Leppert
