## Proposed Stage Location Options

We are still exploring location options for the stage. We are currently reviewing 2 proposed locations.

- Inside center of track, oriented towards 2500 capacity bleachers located along North side of track.
- Near vert competition/festival area, oriented towards crowd moving from vert competition to concessions and flat track competition.

### Sample Stage Plot

This stage plot is representative of a typical rock band stage plot. The actual stage plot may vary depending on the artist booked, but the overall dB levels and orientation/configuration of the stage will not.
