

GENERAL INFORMATION

Applicant: City of Bloomington

Request: Murals Ordinance and Supplemental Policy

SUMMARY

Due to the City’s exterior materials standards applicable to most buildings in Bloomington, the installation of murals directly to a building’s surface is currently limited. The ordinance and supportive policy proposed would amend standards within the Zoning Code to make the installation of murals on private property and buildings using a wider range of methods more feasible. The ordinance and supplemental policy would also establish a mural permit review process to ensure compliance with the proposed standards, ensure minimum quality standards are met, and protect public health, peace, and safety with respect to murals.
