

Project name: Bloomington Fleer Repair Facility – Salt Shed

Architectural number: 22263.01

Project Narrative:

The salt shed building is a new single story 23,675 SF cast in place concrete building with a metal roof structure and metal roof deck. The new salt shed will include a salt storage area, vehicle wash down area, brine room and mechanical space. The only portion of the building that is heated is the wash down area, brine room and mechanical spaces. The building is a one-story building that is fully sprinklered with a dry system in the salt storage area and a wet system within the heated areas of the building.

1

Discuss with maintenance staff how the raising of ditches for much of the road or street can work with the design. Backlog of multiple slow vehicles in the same, tight location is a safety concern.
