Subject: Re: Success Academy (formerly Summit Charter)

Hello Londell,

I've explained to Al Jazari that you anticipate recommending approval of the trash room waiver to the Community Development Manager on the following conditions:

- fix the light outside the trash room
- fix the garage door opener so that the garage door will open/close using an accessible push button
- the garage door must remain closed when trash is not being placed in the trash room
- trash is only taken to the trash room between dawn and dusk

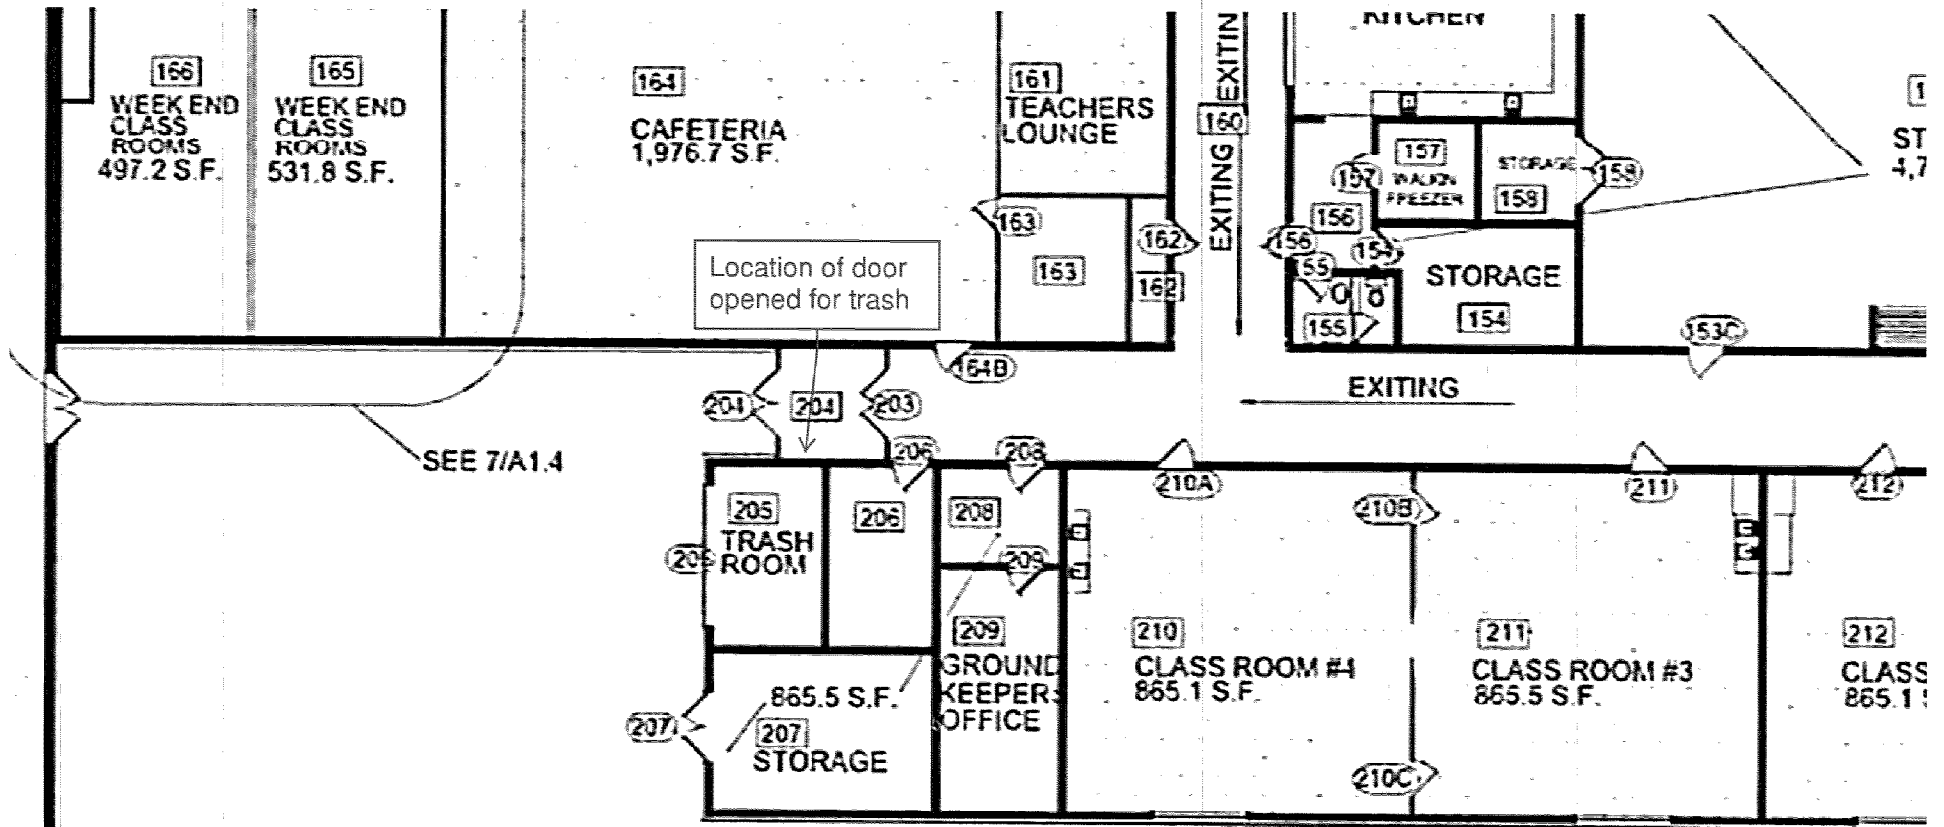

However, if needed, we can address the issue of the waiver through the CUP process.

From our end, there are no objections to any of these conditions.

Please let me know if I have stated anything incorrectly, or if there is anything I've forgotten to include.

Thank you!
