

PL201800325

PL2018-325

Bloomington Planning Division:

We would like your consideration in being able to add onto our building located at 8711 Lyndale Ave. S. The total square footage of the proposed addition would be approximately 4,935 square feet.

The proposed addition would have garage doors on both ends for the entrance and exit of semi-tractor/tankers that will carry food products. The reason for this addition would be for protection from the outside weather conditions to further increase food safety.

Our structural engineer and/or architect will plan for the necessary safe lighting and airflow of the building.
