

Written Project Description for 11216 Bloomington Ferry Rd Bloomington

Our proposal is to build 2 higher end twin homes on the property at 11216 Bloomington Ferry Road. We would work with Matt Pavek at Civil Site Group to appropriately place to meet all of the city of Bloomington requirements for 2 high end twin homes.

We feel this would best fit the property and the area based on other twin homes adjacent down one block and the town homes located next to this lot. It would maximize the use of the beauty offered with the views on this property.
