

**Project Description: Verizon Modification (MIN Killebrew)
2051 Killebrew Drive, Bloomington, MN**

This is a modification to Verizon's existing equipment located on the rooftop of the building located at 2051 Killebrew Drive, Bloomington, MN. Verizon currently has 12 antennas and related equipment installed. Three additional antennas will be added. This project involves standard equipment and standard configuration. Verizon will not be changing the use, increasing the height of the structure or the size of the lease compound, nor should there be any ground disturbance.
