

Project name: Bloomington Fleer Repair Facility – Salt Shed

Architectural number: 22263.01

Project Narrative:

The salt shed building is a new single story 23,675 SF cast in place concrete building with a metal roof structure and metal roof deck. The new salt shed will include a salt storage area, vehicle wash down area, brine room and mechanical space. The only portion of the building that is heated is the wash down area, brine room and mechanical spaces. The building is a one-story building that is fully sprinklered with a dry system in the salt storage area and a wet system within the heated areas of the building.

REVISION SCHEDULE

Discuss with maintenance staff how the raising of ditches for wash off of the mud or snow can work with the design. Backlog of multiple row vehicles in the same right location is a safety concern.

Wash off bay's must be able to handle wash off from other maintenance related tasks such as water main breaks, street sweepers, park maintenance moving equipment, etc. The City must anticipate the wash off activity currently occurring at the Logan site.

Can wash off bay must be able to handle fully extended dump boxes.
